ABOUT HIKVISION

An Industry Pioneer

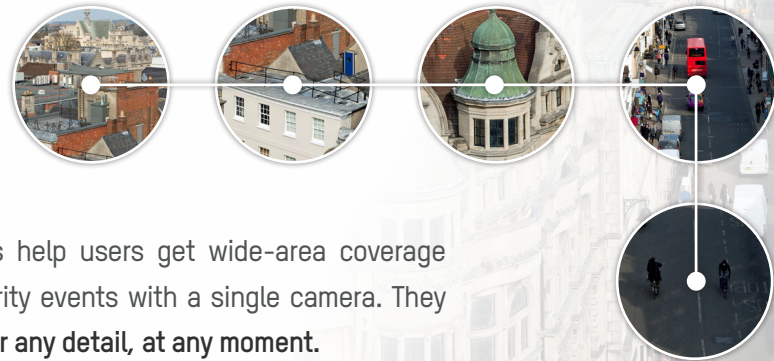

Hikvision is an IoT solution provider with video as its core competency. Featuring an extensive and highly skilled R&D workforce, Hikvision manufactures a full suite of comprehensive products and solutions for a broad range of vertical markets. In addition to the security industry, Hikvision extends its reach to smart home tech, industrial automation, and automotive electronics industries to achieve its long-term vision. Hikvision products also provide powerful business intelligence for end users, which can enable more efficient operations and greater commercial success.

Global Operations

Hikvision has established one of the most extensive regional networks in the industry, comprising 66 international subsidiaries and branch offices to ensure quick responses to the needs of customers, users, and partners.

WHY HIKVISION PTZ CAMERAS?

Hikvision pan-tilt-zoom (PTZ) cameras help users get wide-area coverage and zoom in for further detail of security events with a single camera. They enable users to view from **any angle, for any detail, at any moment.**

View from any angle

Hikvision PTZ cameras cover expansive areas and turn to virtually any angle in a flash.

Panning & Tilting

Left and right, up and down for up to 360°

DS-2DE4425IW-DE(T5)

DS-2DF8C442IXS-AELW(T5)

Auto Tracking

To autonomously track preset types of objects

DS-2DE7A432IW-AEB(T5)

DS-2DF8C442IXS-AELW(T5)

Panoramic Views

Via image stitching of TandemVu PTZs

DS-2SF8C425MXS-DLW(24F0)(P3)

Multidimensional Perception

Assisted by millimeter-wave radar for specific PTZ camera models

iDS-2SR8141IXS-AB(40X) (T2)

See every detail

Hikvision PTZ cameras guarantee the capture of every single detail in a view.

Close-up Views

By zooming in from extended distances with an up to 100x zoom ratio

Ultra High Definition

By supporting resolutions of up to 4K

AI Analytics

To extract object features accurately from video

Smart Linkage

Between various lenses of TandemVu PTZs to track targets and details

At your disposal at any moment

Hikvision PTZ cameras stay vigilant and promise great performance 24/7 in virtually any condition.

Low-light Imaging

For vivid views with rich color even in poor light, as empowered by ColorVu or DarkFighterX

(2 MP) 20x⁺
optical

DS-2DE7A220MCG-EB

(8 MP) 35x⁺
optical

DS-2DF8C835MHS-DELW(T5)

Weather Resistance

To operate in any weather or environment through optical defogging, window wiping, and IP67 ingress protection

(4 MP) 42x⁺
optical

DS-2DF8442IXS-AELWY(T5)

Live Guard

To ward off trespassers with sound and light, around the clock

(4 MP) 42x⁺
optical

DS-2SF8C442MXS-DL(14F1)(P3)

(4 MP) 32x⁺
optical

DS-2DE7A432IW-AEB(T5)

Built-in Heater

To ensure normal startup and operation of the camera when the temperature gets low

(2 MP) 40x⁺
optical

DS-2DY9240IX-A(T5)

(4 MP) 42x⁺
optical

DS-2DF8C442IXS-AELW(T5)

ColorVu technology renders excellent imagery in low light through a super-large aperture.

DarkFighterX technology employs dual sensors for bi-spectrum image fusion.

WHERE TO DEPLOY PTZ CAMERAS?

Perimeters

Bottlenecks

Conventional solutions require several cameras to cover an entire perimeter. Management quickly becomes overly complex. With false alarms triggered by swaying leaves or scurrying animals, these systems are costly and inefficient.

Solutions

A single Hikvision PTZ Camera covers a wide area and features longer IR distances and larger zoom ratios. They detect humans and vehicles with AcuSense technology. Moreover, automated visual and auditory warnings are powerful tools to keep trespassers away.

City Intersections

Bottlenecks

With conventional solutions, one intersection used to require at least 4 cameras for complete coverage. And even after installing a conventional PTZ camera at an intersection, zooming in means losing the big picture.

Solutions

With a TandemVu PTZ, bullet and PTZ lenses can work together to track a target. The bullet lenses secure the panoramic view when the PTZ lens zooms, pans, or tilts. The perfect low-light imaging of the PTZ ensures easy recognition and recording of a vehicle's color even at night.

Public Squares

Bottlenecks

Public squares have no specific entrances or exits, and the entire area must be constantly monitored. Conventional cameras cannot provide sufficient coverage or adequate zoom ratios to get all the necessary details.

Solutions

The bullet lens of a TandemVu PTZ can monitor an entire square while the PTZ lens focuses on details as it rotates and zooms. Security personnel can manually draw a frame in the bullet lens image, and then tap the zoom-in power of the PTZ lens to quickly obtain the details of the scene.

Expressways

Bottlenecks

Covering the length of an entire highway with conventional security cameras is an enormous installation. And, conventional cameras can hardly track vehicles at high speeds or capture key information in poor light.

Solutions

One TandemVu PTZ camera accomplishes the tasks of multiple conventional cameras. Its bullet lens can monitor multiple lanes on an expressway, while the PTZ lens tracks fast-moving vehicles to obtain information like license plate and vehicle type, even at night.

Outdoor Parking

Bottlenecks

In addition to safety-related monitoring, parking administrators also need to know the operating conditions in a car park. This is not easy with conventional solutions, especially when the whole scene must remain in view while zooming in for details.

Solutions

A TandemVu PTZ's bullet lens can help the car park administrator understand the overall parking status and the distribution of vacant spaces. Its PTZ lens, on the other hand, tracks incoming and outgoing vehicles, and performs detailed monitoring of targets when incidents occur.

Any angle. Any detail. Any moment.
